Version: 23.11.1

Page.pdf() method

Generates a PDF of the page with the `print` CSS media type.

Signature

```
class Page {
  abstract pdf(options?: PDFOptions): Promise<Uint8Array>;
}
```

Parameters

Parameter	Type	Description
options	PDFOptions	*(Optional)* options for generating the PDF.

Returns:

Promise<Uint8Array>

Remarks

To generate a PDF with the `screen` media type, call `page.emulateMediaType('screen')` before calling `page.pdf()`.

By default, `page.pdf()` generates a pdf with modified colors for printing. Use the `-webkit-print-color-adjust` property to force rendering of exact colors.
